

New Item:

FP200 in 10 oz "mini" can

Abesco FP200 single-pack fire-rated polyurethane expanding foam is designed to prevent the spread of fire (up to 2 hours) and smoke, from one compartment to another, through gaps and voids in walls and floors. FP200 is CFC free, and has excellent acoustic and thermal insulation values.

Code# 20410 for 10 oz. can
12 cans per case

Tested to ASTM E-814 (UL1479)

Don't forget about: Abesco FP200 in the 24 oz can!
Code# 20424 for 24 oz can

New "L-Rating" testing on file targeted towards increasing demands for smoke & draft seals in firestopped penetrations for hospitals, educational facilities, & other markets! Our FP200 FR Expanding Foam, CT120 Cable transits and other firestop products have updated UL Systems you will want to know about! Be ahead of the pack with this information!

Abesco FP200 is LEED friendly with a VOC Rating of 26.3 g/l.
Abesco FP200 has an R-7 insulative value, STC 38.
